

GLOW BEAUTY

Abstract

Glow Beauty is a web-based makeup-products e-commerce application developed to provide a simple and user-friendly platform for browsing and purchasing beauty products online. The system allows users to view makeup products along with their names, brands, prices, images and descriptions. Users can register and log in, view product details, add products to a wishlist, and purchase products through the order and checkout process. The application also stores user, product, cart and order information in a database. Glow Beauty provides an organized and convenient shopping experience and can be further enhanced with online payment, product search, reviews and order tracking features.
